SUMMARY

Full-stack Software Engineer building production web applications with TypeScript, React, Node.js and PostgreSQL. Sole engineer behind a multi-module company ERP used for solar project tracking, land leasing, O&M finance and quality inspections, owning everything from schema design and APIs to UI, deployment and data migration. Daily Linux user.

EXPERIENCE

PSA Renewables

Jun 2026 – Present

Software Engineer

Aug 30, 2026 – Present

Web Designer

Jun 15, 2026 – Aug 29, 2026

- Designed and built the company's **internal ERP** end to end as sole developer: Node.js/Express + TypeScript backend, Prisma on PostgreSQL (Neon), and a React + Vite + Tailwind frontend.
- Building a growing set of business modules on one shared platform, including **project tracking** (solar construction progress, site map, inventory, reports), **land management** (leases, payment schedules, approvals), **operations finance** (budgets, expense claims, vouchers, stock) and **quality** (vendor and site inspections with a review flow).
- Built a **permission-based access system**: a single permission catalogue per module, a department/designation editor, JWT + bcrypt authentication, instant lock-out of deactivated users, and multi-step approval chains for payments.
- Integrated **Google Drive API** for document storage, email (Nodemailer/SMTP), WhatsApp alerts, browser **web push** notifications, and cron-scheduled reminder jobs.
- Set up separate **dev and production** environments on Render, each with its own database; wrote guarded migration and deployment scripts and Excel/PDF data-import scripts to move legacy records into the system.
- As Web Designer, created the ERP's UI system – shared component library, module colour accents, responsive layouts and dashboards with Recharts.

SKILLS

Languages: TypeScript, JavaScript, SQL, HTML, CSS

Frontend: React, Vite, Tailwind CSS, React Router, Recharts

Backend: Node.js, Express.js, REST APIs, Prisma ORM, JWT authentication

Databases: PostgreSQL (Neon)

Tools & Platforms: Git, Linux (Arch daily driver, Debian server), Render, Google Drive API, VS Code

PROJECTS

EchoWrite-Blog Feb 2025 – Mar 2025 | [GitHub](#) | [Live](#)

- Blogging platform built with React, Node.js, PostgreSQL and Tailwind CSS.
- Implemented Google and OTP sign-in, post visibility settings, likes, comments and follows.

Hangman Game

Jan 2025 | [GitHub](#) | [Live](#)

- React + Tailwind CSS game with dynamic word validation and a responsive layout.

Pokédex

Jan 2024 | [GitHub](#) | [Live](#)

- Node.js/Express app that fetches data from a public REST API, with a custom-designed interface styled entirely in hand-written CSS (no framework).

EDUCATION

Maharshi Dayanand University – B.Tech, Computer Science and Engineering

2022 – Present

BSM Sr Secondary Public School (CBSE) – Class XII

2021 – 2022

BSM Sr Secondary Public School (CBSE) – Class X

2019 – 2020

CERTIFICATIONS

Udemy – Web Development Bootcamp

Jan 2025 | [Certificate](#)
